Composites Science and Technology **43** (1992) 391–392

Subject Index to Volume 43

Angle-ply laminates, 309
Anisotropic medium, 369
Antisymmetric laminates, 309
Aramid fibre composites, 105
Axial compression, 105

Beam analysis, 329
Bending, 229
Bismaleimide resin, 117
Bulk effects, 237

Carbon/PEEK, 129, 299, 339
Caustics, 369
CDM (continuum damage mechanics), 185
Ceramic fibres, 221
CFRP, 25, 37, 49, 55, 105, 129, 197, 229, 283
Characterization, 159
CMCs, 13, 245
Compression, 229
Compression failure, 171
Constitutive model, 185
Continuum damage mechanics (CDM), 185
Creep modulus, 269
Critical fibre length, 379

Damage, 185, 257
Damping, 159
DCB specimens, 329
Debonding, 37, 379
Deformation, 269, 299
Delamination, 317
Delamination cracks, 317
Dimensional stability, 207
Dynamic failure, 25

Elastic modulus, 95
End corrections, 251
End loaded flexure (ELF) tests, 251
End-notched flexure (ENF), 55, 251
Energy release rate, 251
ENF. *See* end-notched flexure

Failure, 339
Failure criteria, 197
Failure mechanisms, 3, 37, 137
Fatigue, 105
FEA. *See* finite element analysis
Fibre bundles, 171
Fibre distributions, 95
Fibre ends, 137
Fibre strength (modelling), 221
Fibre structure, 269
Fibre/matrix adhesion, 317
Fibre/matrix debonding, 37
Finite element analysis (FEA), 159, 207
Flaws, 221
Flexural vibration, 159
Fracture, 269, 317
Fracture toughness, 49, 283
Fragmentation test, 379
Free crystallization, 299
Free-edge delamination, 147
Frictional shear stress, 379

Glass ceramic, 245
Glass fibre mat, 269
Glass reinforced polypropylene, 269
GRP, 25, 171

High-temperature composites, 347, 359
Higher-order theories, 309
Hybrid composites, 71, 105, 137
Hydrostatic pressure, 171

ILSS. *See* interlaminar shear strength
Impact behaviour, 317
Impact loading, 25
Ineffective length, 137
Initial failure maps, 359
Interface control, 85
Interfacial bond, 379
Interlaminar fracture, 49, 129
Interlaminar fracture toughness, 37, 329
Interlaminar shear, 55
Interlaminar shear strength (ILSS), 37
Interlaminar stress, 147
Interleaving, 55

Kinking, 171

Laminate damage, 257
Laminate failure, 197
Laminated composite plates, 359
Load transfer, 245

Matrix cracking, 185
Metallic glass, 245
Micromechanics, 137, 207
Microstructure, 13, 85, 171
MMC laminates, 207
MMCs, 85
Mode I delamination, 283
Mode I failure, 129
Mode II failure, 129
Mode II fracture toughness, 251
Modelling fibre strength, 221
Modified epoxy resin, 283
Mori-Tanaka approximation, 347
Multiaxial loading, 171, 197
Multimodal Weibull distribution, 221

Off-axis testing, 339
Optical mapping, 369

Paper elasticity, 369
PEEK, 37, 299
PES, 37
PET, 237
Plasticity, 339
Poisson's ratio, 369
Pseudocaustics, 369
Pull-out, 3

R curve, 283
Rate effects, 3
Reaction-bonded SiC/Si_3N_4, 13
Residual stresses, 221
Ribbon reinforcement, 245

Shear fatigue, 105
Short-fibre composites, 137, 237
SiC whiskers, 13
SiC/aluminium composites, 85
SiC/Si_3N_4 composites, 13
Sintering additives, 13
Sol-gel methods, 85
Splitting, 171
St Venant effects, 329
Stacking method, 147
Standardization, 129

Composites Science and Technology **43** (1992)—© 1992 Elsevier Science Publishers Ltd, England.

Stochastic failure, 25
Strain rate dependence, 105
Strain to failure, 229
Stress fields, 237
Stress intensity factor, 221
Stress/strain/temperature relationships, 309
Structural composites, 275
Sublaminate approach, 147
Surface effects, 237
Synergism, 71

Temperature dependent moduli, 347
Thermal buckling, 309
Thermal effects, 339
Thermal stress, 347
Thermal treatments, 99
Thermo-mechanical deformation, 359
Thermo-mechanical loads, 207, 359
Thermo-mechanical stress, 347
Thermoplastic composites, 49, 339
Thermoplasticity, 207
Thick laminate, 147
Three-dimensional fabrics, 117
Threshold stress, 221
Through-thickness effects, 117
Toughened epoxies, 3
Toughness, 3
Transverse properties, 95, 369
Transverse shear deformation, 309

Unidirectional composites, 229, 245, 347

Vibration coupling, 159

Wear, 71
Wear resistance, 71
Weibull distribution, 221
Whiskers, 85
Woven fabric composites, 117

X-ray diffraction, 13

Yarn bundles, 117
